# Maryam Rauf

Portfolio | Linkedin | Github | Email

## Summary

Full Stack Developer working across the MERN stack and AI engineering. Built web applications with React, Express, MongoDB, authentication, authorization and Express APIs, and AI applications using RAG and the LangChain framework.

## Experience

**NexenLabz** Aug 2026 to Oct 2026

*MERN Stack Intern* *Remote, Lahore*

- Worked on React interfaces, Express REST APIs and MongoDB data models for web applications.
- Implemented authentication with email and password and Google OAuth, using JWT sessions in HTTP only cookies.
- Improved API performance by 25% and signup security by adding rate limiting of 5 requests per minute.

**NovaXccelerate** Dec 2025 to Mar 2026

*ML Engineer Intern* *Hybrid, Mansehra*

- Trained a spam email classifier using TF IDF features and Logistic Regression in a scikit learn pipeline, with single message and batch CSV prediction and confidence scores.
- Built a retrieval augmented calculus tutor that grounds Gemini answers in textbook content using embeddings and cosine similarity.
- Developed Interv0id, an AI interview preparation app with generated questions, a conversational interviewer and evaluation, using Groq hosted Llama models and Streamlit.

## Technical Skills

**Languages**: JavaScript, Python, HTML, CSS
**Frameworks**: React, Node.js, Express.js, Redux Toolkit, Tailwind CSS, Material UI, Bootstrap, EJS, Streamlit
**AI and ML**: scikit learn, NLP, LLMs, Transformers, AI APIs, LangChain, LangGraph (basic), Pinecone (vector database)
**Security**: OAuth, JWT, Authentication, Authorization, Protected routes, Access control
**Developer Tools**: Git, GitHub, MongoDB, MongoDB Atlas, Postman, Railway, Vercel

## Projects

**Memento** | *Blogging platform*

- Built a server rendered blogging platform using Express, EJS and MongoDB with Google OAuth, JWT authentication in HTTP only cookies and author only editing and deletion.
- Publicly posted on LinkedIn: got 10 users and 21 visitors with 83 page views, a 33% bounce rate and a 98% Real Experience Score for speed.

**Notes Keeper** | *Full stack notes application*

- Developed a responsive notes app with React, Vite, Material UI, Axios, Node.js, Express and MongoDB, with account registration and login, note editing, trash, restore and permanent deletion.

**Calculus AI Tutor** | *RAG based tutoring application*

- Built a retrieval augmented tutor using Google Gemini and a calculus textbook knowledge base, with contextual retrieval, image uploads for math questions, conversation history and a Streamlit interface.

## Education

**Hazara University** 2024 to 2028

*Bachelor of Science in Computer Science, CGPA: 3.89/4.00, 5th Semester* *Mansehra, Pakistan*

## Certifications

**Claude Academy: AI Fluency for students** | *Anthropic* October 2026

**The AI Engineer Course 2026** | *Udemy, 365 Careers: LLMs, AI APIs and Agents* March 2026

**AI For Everyone** | *DeepLearning.AI on Coursera: AI Strategy and Project Life Cycles* November 2025
